

TITLE INDEX

(Volume 49)

- Accuracy of Teacher Reports of Their Classroom Behavior.* No. 1, p. 1, Hook and Rosenshine
- Adjunct Postquestions in Text: A Critical Review of Methods and Processes.* No. 2, p. 181, Rickards
- Analysis of Frameworks for Research on Innovation and Change in Higher Education.* An. No. 3, p. 411, Dill and Friedman
- Can Advance Organizers Influence Meaningful Learning?* No. 2, p. 371, Mayer
- Conflict in the Classroom: Controversy and Learning.* No. 1, p. 51, Johnson and Johnson
- Differential Diagnosis-Prescriptive Teaching: A Critical Appraisal.* No. 4, p. 517, Arter and Jenkins
- Does Answering Higher Level Questions While Reading Facilitate Productive Learning?* No. 2, p. 280, Andre
- Effects of Type and Combination of Feedback Upon Conceptual Learning by Children: Implications for Research in Academic Learning.* No. 3, p. 459, Barringer and Gholson
- Examination of Test-Wiseness in the Cognitive Test Domain.* An. No. 2, p. 252, Sarnacki
- Experiments Relating Teachers' Use of Higher Cognitive Questions to Student Achievement.* No. 1, p. 13, Winne
- Extrinsic Reward and Intrinsic Motivation: A Review With Implications for the Classroom.* No. 4, p. 557, Bates
- Home-based Reinforcement of School Behavior: A Review and Analysis.* No. 3, p. 436, Barth
- Increasing Children's Self-Control Through Cognitive Interventions.* No. 2, p. 319, Pressley
- Increasing Educational Achievement Via Self Concept Change.* No. 1, p. 131, Scheirer and Kraut
- Learned Helplessness and Expectancy Factors: Implications for Research in Learning Disabilities.* No. 2, p. 208, Thomas
- Linguistic Interdependence and the Educational Development of Bilingual Children.* No. 2, p. 222, Cummins
- Nonverbal Communication in Teaching.* No. 4, p. 631, Smith
- On the Effectiveness of Students' Evaluative Feedback to University Instructors.* No. 3, p. 497, Rotem and Glasman
- Physical Environment of the School, The: A Review of the Research.* No. 4, p. 577, Weinstein
- Predicting Academic Achievement from Classroom Behavior.* No. 3, p. 479, Hoge and Luce
- Psychological Effects of the "Open Classroom."* No. 1, p. 71, Horwitz
- Pygmalion Grows Up: A Model for Teacher Expectation Communication and Performance Influence.* No. 3, p. 389, Cooper
- Recent Research on Visual Mnemonics: Historical Roots and Educational Fruits.* No. 4, p. 611, Higbee
- Research on Clinical Teaching.* No. 1, p. 151, Daggett, Cassie, and Collins
- Research on Training Counselors and Clinicians.* No. 1, p. 87, Ford
- Schema Learning Theory: An Approach to Perceptual Learning.* No. 2, p. 197, Milligan

SUBJECT INDEX

(Volume 49)

- Ability profiles: and academic achievement, 542-43
- Ability training: effects of, 547
- Academic achievement: and ability profiles, 542-43; and open classroom, 75-76; and remediation, 540-42; and school program factors, 224-25; and self-concept, 132-33; and sociocultural factors, 223-24; linguistic factors, 223-24; of minority language children, 222-24; predicting from classroom behavior, 479-96
- Academic achievement and behavior: evaluation of studies, 486-93; overview of studies, 480-86; reliability of studies, 486-87; validity of studies, 487-93
- Academic achievement factors: of minority language children, 222-24
- Academic learning: and effects of feedback upon conceptual learning by children 459-78
- Academic performance: and blank-trial effects, 474; and distraction effects, 473-74; and expectation communication, 395-403; and uncontrolled information variables, 472-73; implications of feedback research for the modification of, 470-74; research for determinants of, 389
- Academic programming: and DD-PT, 547-50
- Addition theory, 375
- Adjunct postquestions, 181-96; and direct and indirect effects, 182-83; and "forward" processing, 182-83; and "shaping hypothesis," 188-89
- Adjunct question paradigm: and concept of mathemagenic behavior, 181-82; discussion of, 193-94
- Adjunct questions: and "direct effect," 181; and inserted questions, 284; and remedial reading, 194; in CAI settings, 194; Rothkopf's paradigm, 181-82
- Advance organizers: and conceptual anchoring, 373; and learning, 371-83; and oblerative subsumption, 373; cognitive theories of, 373-76; research on, 371-72
- Affect manipulations: and self-control, 341-43
- Anxiety reduction training, 108-09
- Artifacts: and nonverbal communication, 651-53
- Assimilation Encoding theory, 375-81; nine experimental tests of, 376-81
- Attention training: and modification of impulsivity, 356-58
- Attribution theory: 210-15
- Bank Street studies, 73-74
- Bayesian approach: and statistical considerations in nonverbal communication, 660-61
- Behavior: and classroom token economy, 557; classroom, 1-10; dimensions of teacher, 6-7; spatial, 592-94
- Behavioral contrast: and infrahuman research, 558-59; and intrinsic motivation, 559
- Behavioral training, 98-99
- Bilingual children: and linguistic interdependence, 222-51; language and thought in, 226-27
- Bilingual education: an interaction model of, 241-43
- Bilingual education programs: need for a theoretical framework, 225-26
- Bloom's taxonomy: and higher cognitive questions, 18-19, 22; and student achievement, 18
- CAI settings: use of adjunct questions in, 194
- Children: and mnemonics, 623; and self-control, 319-70; and verbal control

- of motor behavior, 321-22; bilingual, 222-51
- Classroom behavior: and expectation, 393-95; and general teacher style, 8, 10; home-based reinforcement of, 436-58; predicting academic achievement from, 479-96; teacher reports of, 1-10
- Classroom design and furniture arrangement, 581-85
- Classroom reward system: and disruptive behavior, 557; evidence against, 557-58
- Classrooms: conflict in, 51-69; "soft," 598
- Clinical teaching: and teacher training programs, 157-58; general observations on, 153-55; research on, 151-69; sociological studies of, 155-57; studies exploring alternative models of, 164-65; studies of actual, 161-64; studies of supervisors' training roles, 159-61; studies on, 158-65
- Clinicians: research on training of, 87-130; *see also* Training
- Clown Box experiment, 330-34
- Cognitive development: and schema learning, 204
- Cognitive dissonance theory: and self-perception theory, 559
- Cognitive interventions: and increasing children's self-control, 319-70; and modification of impulsivity, 358-59; and self-verbalization effects, 330-38; effects on children's behaviors, 330-50
- Cognitive test domain: and test-wiseness, 252-79
- Communication: and awareness, 635; and conscious encoding and decoding, 635; and education, 633; definitions of, 634-37; nonverbal, 631-62; of teacher expectation, 389-410
- Conceptual anchoring: definition of, 373
- Conceptual learning: and effects of feedback upon children, 459-78; and tangible feedback, 463-69; and verbal feedback, 460-63; review of feedback research, 460-69; summary of feedback effects, 469-70
- Conflict: and epistemic curiosity, 53-54; conceptual, 53-54; definition of, 52-53; in the classroom, 51-69
- Controversy: and competence, 61; and relevant information available, 160; context of, 58-59; definition of, 53; homogeneity of people involved in, 59-60
- Counselors: research on training of, 87-130; *see also* Training
- Decontextualized language, 238-40
- Delay-of-gratification: and cognitive interactions, 330-50
- Developmental Interdependence Hypothesis: and bilingualism, 3-36
- Diagnostic-prescriptive teaching: definition of, 518; *see also* Differential diagnosis-prescriptive teaching (DD-PT)
- Differential diagnosis: definition of, 517; *see also* Differential diagnosis-prescriptive teaching (DD-PT)
- Differential diagnosis-prescriptive teaching (DD-PT): and academic programming, 547-50; and early childhood educational programs, 526; and remediation techniques, 519; and special education, 518; and task analysis, 518-19; basic assumptions (discussion), 521-50; critical appraisal of, 517-55; criticism of, 543-50; proliferation of, 518-21; reliability of tests used in, 522-24, 546; support for, 520; validity of tests used in, 524-37, 546-47
- "Direct effect": and adjunct questions, 181
- Directed attention model (DAM), 287-88; and encoding, 289-92; and productive learning prose model, 312; and verbatim recall, 292-93; nature of attention in, 288-92
- Early childhood educational programs: needs of, 520
- Education: and communication, 633; and memory, 622-23; and mnemonics, 622-24
- Educational achievement: and self-concept change, 131-49
- Educational development: of bilingual children, 222-51
- Educational research: and nonverbal communication, 658-60; problems of, 655-57
- Effort-outcome covariation: and expectation, 401-03
- "Egg-crate" school buildings, 594
- Encoding: and directed attention model (DAM), 289-92

- Evaluation: political function of, 82-83; "scientific" function of, 82; teaching function of, 81
- Expectancy factors: and learned helplessness, 208-21
- Expectation: and classroom behavior, 393-95; and effort-outcome variation, 401-03; as an independent variable, 390; climate and student interaction initiation, 400-01; feedback and student interaction initiation, 400-01; limitations on findings, 392-93; a review of research, 390-93
- Expectation communication: and academic performance, 395-403; and teacher control, 396-400
- Expectation communication and behavior influence: a model for, 396
- Extrinsic reward and intrinsic motivation: a review with classroom implications, 557-74
- Feedback: impact of student, 498; *see also* Student feedback, Student ratings
- Feedback and hypothesis theory, 468-69
- First language (L1) development: and home-school language switching, 236-37
- Flanders Interaction Analysis System: and teacher reports of classroom behavior, 4-5
- Gamson's typology: causal modeling of frameworks, 424-32; comparison of frameworks, 423-24; complex organization framework, 415-17, 426-27; conflict framework, 417-19, 427-28; diffusion framework, 419-20, 420-23, 430-32
- Grade level: and test-wiseness, 258
- Grade point average: and mnemonics, 621
- Higher cognitive questions: and Bloom's taxonomy, 18; teachers' use of and student achievement, 13-46
- Higher education: an analysis of frameworks for research on innovation and change in, 411-35; innovation and organizational change, 412-14; typologies of innovation research, 414-15
- Higher level questions: and productive learning, 280-318; higher order effects from, 298
- Home-based reinforcement: adjunctive, 448-50; facilitating the usage of, 452-53; future directions, 453-54; in group homes, 438-40; in the natural environment, 440-51; of school behavior, 436-58; parental involvement, 440-44; teacher involvement, 444-45; types of home consequence, 445-48; use by school counselors, 450-51
- Impulsive behaviors: effects of cognitive strategies in modifying, 350-59; *see also* Modification of impulsive behaviors
- Impulsive responding: and self-verbalization, 353-56
- Innovation research: Gamson's typology, 415-23; typologies of, 414-15
- Inserted questions, 284
- Instruction: and mnemonics, 621
- Integrated Didactic-Experimental Training (IDET), 109-12
- Interpersonal communication: influence of nonverbal communication on, 631
- Interpersonal Process Recall (IPR), 107-08
- Intrinsic and extrinsic motivation: theoretical approaches to, 558-61
- Intrinsic motivation: and behavioral contrast, 559; and extrinsic reward, 557-74; and token economies, 558; variables affecting, 561-72
- Introact procedures: and feedback and hypothesis theory, 468
- Kinesics: and nonverbal communication, 648-50
- Language: decontextualized, 238-40
- Language switching, 236-37
- Learned helplessness: and expectancy factors, 208-21; counteracting, 216-18; definition of, 209-10; implications for future research, 218
- Learning: and advance organizers, 371-83
- Learning disabilities: and expectancy factors, 208-21
- "Learning environment": definition of, 577
- Level-of-question: and productive learning

- prose model, 310-12; definition of, 282-83
- Linguistic interdependence: and educational development of bilingual children, 222-51; and "immersion" and "submersion" programs, 222-23
- Local consistency: and feedback and hypothesis theory, 468
- Locus of control: and open classroom, 78-79
- Mathemagenic behavior: and adjunct question paradigm, 181-82
- Medical schools: and training, 151-52
- Memory: and education, 622-23; and reading, 622
- Metalinguistic insights: and reading, 238
- Microcounseling (MC), 105-07
- Minority language children: and academic achievement factors, 222-24
- Mnemonics: and children, 623; and education, 622-24; and grade point average, 621, and instruction, 621; and reading, 622; and understanding, 622-23; definition of, 611; educational implications of, 620-24; history of, 612; legitimacy of, 612-14; visual, 611-24
- Motor behavior: and external verbalizations, 326-28; and preschoolers, 328-29; and verbal control, 321-22
- Multidimensional scaling: and schema learning, 199
- Noise: in classrooms, 589-92
- Nonverbal communication, 631-62; and educational research, 658-60; and interpersonal communication, 631; and teaching, 631-62; artifacts, 651-53; categories of, 638-40; educational research on, 640-53; environmental factors, 641-44; kinesics, 648-50; literature, 637-40; paralanguage, 651; physical characteristics, 651; proxemics, 644-48; significance of in teaching, 632-34; statistical considerations, 660-61; teacher awareness of, 633; technological considerations, 660; theoretical and methodological issues, 653-61; touching behavior, 650-51
- Oblervative subsumption: definition of, 373
- Open classroom: and academic achievement, 75-76; and adjustment and anxiety, 78; and attitude toward school, 76-77; and child-centered philosophy, 131-32; and cooperation, 79; and creativity, 77; and curiosity, 77-78; and independence and conformity, 77; and locus of control, 78-79; and self-concept, 76; definition of, 72; psychological effects of, 71-85
- Open education: definition of, 577-78
- Open space and open education: distinction between, 594
- Open-space schools: and teacher attitudes and behavior, 595; definition of, 578; discussion of, 597-98; studies of, 594-98
- OSCAR 5V schedule: and training effects, 16
- Overjustification hypothesis, 560
- "Paradigm": concept in nonverbal communication theory and research, 653-54
- Paralanguage: and nonverbal communication, 651
- Pattern classification: and schema learning, 199; and schematic concept formation, 200-01
- Pattern quantification: and schema learning, 199, 201-02
- Perceptual learning: and schema learning theory, 197-207
- Performance influence: and teacher expectation, 389-410
- Personal causation: 560-61
- Personal control formulation: and expectation communication, 400
- Preschoolers: and motor behavior, 328-29
- Prescriptive teaching: *see* Differential diagnosis-prescriptive teaching (DD-PT)
- Process-Product Paradigm: and nonverbal communication, 657-58, 660
- Productive learning prose model, 302-10; and directed attention model (DAM), 312; and level of question, 310-12; and representation in semantic memory, 304-06; and strategies for task learning, 309-10
- Programmed texts, 103-04
- Proxemics: and nonverbal communication, 644-48

- Purves classification system: and student achievement, 19-20
- Pygmalion effects, 401
- Pygmalion-prone teachers: identification of, 404
- Pygmalion study, 390-91, 393
- Quantified pattern feature approach: and schema learning, 202-04
- Question level: empirical studies of, 283-84; methodological criticisms of studies, 299-302
- Reading: and higher level questions, 280-318; and memory, 622; and metalinguistic insights, 238
- Reading-disabled children: and memory, 622
- Reception theory, 373-75
- Remedial reading: and adjunct questions, 194
- Remediation: and academic achievement, 540-42; and prescriptions generated from differential diagnosis, 537-40; pressure to develop effective techniques, 519
- Remediation techniques: and Differential diagnosis-prescriptive teaching model, 519
- Rewards: contingent-expected, 561-65; noncontingent-expected, 565-70; task-inherent, 570-71; unexpected, 571
- Rothkopf's paradigm: adjunct questions, 181-82
- Schema development: effect of task on, 306-09
- Schema learning: and cognitive development, 204; and multidimensional scaling, 199; and pattern classification, 199-201; and pattern quantification, 199, 201-02; definition of, 197-99; quantified pattern feature approach, 202-04; theoretical approaches to, 199
- Schema learning theory: and development of culture-fair measures of general learning ability, 206; applications of, 204-05; an approach to perceptual learning, 197-207; future developments in, 205-06
- Schematic concept formation: and pattern classification, 200-01
- School behavior: and home-based reinforcement in group homes, 438-40; and report cards, 437-38; and school notes, 437-46, 540-51; home-based reinforcement of (review and analysis of), 436-58
- School notes: and school behavior, 437-46, 450-51
- Schools: and research designs, 600-03; and person-environment relations, 577; and studies of specific environmental variables, 578-92; concern with specific environmental variables of, 577; "egg-crate," 594; physical environment of (review of research), 557-603
- Seating position: in classroom, 578-81
- Self-concept: and academic achievement, 132-33; and educational achievement, 131-49; and educational programs, 134-40; and open classroom, 76
- Self-control: and affect manipulations, 341-43; increasing of children's through cognitive interventions, 319-70
- Self-perception theory, 559-60
- Self-verbalization: and cognitive effects, 330-38; and impulsive responding, 353-56; and modification of impulsive behaviors, 350-53
- "Semilingualism," 228, 230-31
- "Shaping hypothesis": and adjunct postquestions, 188-89
- Skills experiments: and teacher effects, 25-36
- Spatial behavior: ecological studies of, 592-94
- Special education: and Differential diagnosis-prescriptive teaching (DD-PT), 518; differentiated from regular, 520
- Student achievement: and open-space schools, 595-97; and Purves classification system, 19-20; experiments relating teachers' use of higher cognitive questions to, 13-46
- Student feedback: and the "Solomon four-group design," 505; attributes of recipients of, 503-05; effectiveness of to university instructors, 497-511; impact of, 498; methodological issues, 505-07; propositions for further research,

- 507-08; *see also* Student ratings
- Student performance: and teacher expectation, 396
- Student ratings: as a source of information on teaching, 498-500; nature of, 500-03
- Task analysis: and Differential diagnosis-prescriptive teaching (DD-PT) model, 518-19
- Teacher effects: and skills experiments, 25-36; and training experiments, 15-25; review of research on, 14-36
- Teacher expectation: and student performance, 396; communication and performance influence, 398-410; four-factor categorization, 393-95
- Teacher training programs: and clinical teaching, 157-58
- Teachers: and awareness of nonverbal communication, 633
- Teaching: and evaluation, 81; and nonverbal communication, 631-62; clinical, 151-69; definition of, 633
- Test-wisness (TW): and absurd option strategy, 257-58; and cue-using strategy, 261-62; and deductive reasoning strategy, 257; and error-avoidance tactics, 254, 263; and "give-away," 258-59; and grade level, 258; and guessing, 253, 245-56; and response sets, 253; and risk-taking, 253, 256-57; and test-constructor, 259-60; and test-taking experience, 264; and time-using strategies, 254; and "umbrella terms," 258; correlates of, 268-70; definition of, 253; an examination of, 252-79; historical perspective, 252-53; manifestation of, 265-66; measures of, 270-73; methods to minimize effects of, 273-76; taxonomy of, 254-63; theoretical approaches to, 266-68
- Threshold Hypothesis: and bilingualism and cognition, 227-33
- Token economies: and feedback research, 471-73, 474; and intrinsic motivation, 558
- Training: and medical schools, 151-52; of counselors and clinicians (overview), 88-90; personal therapy in, 117-18; supervisory approach, 114-15; "traditional," 112-14
- Training effects: and OScaR-5V schedule, 16
- Verbal control: and motor behavior, 321-22
- Verbal phenomena: speech, 634; *see also* Communication
- Verbatim recall: and directed attention model (DAM), 292-93
- Videotape self-confrontation, 104
- Visual imagery: and bizarreness in mnemonics, 618-19; and instruction, 624; and interaction in mnemonics, 616-17; and own- versus other-supplied mediators in mnemonics, 619; and vividness in mnemonics, 617-18; as a mnemonic technique, 611; old and new in mnemonics, 614-15; use of in mnemonics, 615-16
